SPRING CITY SOLAR POWERED LIGHTING ON THE GROUNDS OF THE
UNITED STATES CAPITOL

Spring City, PA, October 1st, 2008- On the Dirksen Senate Office Building parking lot now resides the District of Columbia's standard with a solar powered attachment requested by the Architect of the Capitol. This parking lot was unable to send electrical wiring to illuminate the lot therefore lending itself well to solar powered lighting installation.

Spring City was happy to supply the Capitol with the approved lighting standard equipped with a solar power panel. This product is LEED certified for the reason that the energy source is solar powered, use of recycled manufacturing material and the distance of Spring City's foundry to the location of the installation. We would be happy to discuss your solar powered needs. For more information, call 610-948-4000.

About Spring City:

The 115 Spring City employees have a cumulative experience of 1200 years with the company. Spring City's core business consists of cast iron and cast aluminum ornamental lighting systems. Our company combines modern technology with old fashion craftsmanship. With Spring City, you can choose from the country's widest range of traditional styles - or create your own custom designs. And since we don't send

our work out to another foundry (or another country,) we can maintain tight project timing and stringent quality control over every single step of your job, from initial preparation all the way to final finishing. For more information, please visit www.springcity.com
