CAYMAN ISLAND HAS A NEW CUSTOM ARCHITECTURAL LED BOLLARD  
DESIGNED FOR A PROMINATE AREA ON THE ISLAND OF CAYMAN ISLAND.

**Spring City, PA, May 15<sup>th</sup>, 2008**-Picture a horseshoe bollard lined with LEDS

illuminating the custom brick work that serves many functions other than the normal use of a bollard. Spring City Electrical Manufacturing is proud to announce the installation of The Cayman Island Bollard for Camana Bay.

Spring City began working with L'Observatoire's Hervè Descottes world-renowned lighting designer and the project director, Natalie Rozot in 2006. L'Observatoire and Spring City had worked together on Columbus Circle in New York, NY, previously. Spring City is able to create custom fixtures efficiently by keeping all services under one roof. Located in Spring City, PA, a town of 3,000, a foundry, engineering, sales and many other departments coincide.

This custom bollard consists of a circular shape that will be mounted below a custom brick foundation and is illuminated with LEDs to provide the right amount of lighting. Since the theme for this town is new urbanism the project calls for lighting design that is inviting and functional to pedestrians as well as environmentally friendly.

Spring City is able to ship their products not only to metropolitan areas but as well as Hong Kong and the Cayman Islands to name a few. In order to ensure the products arrives at installation on time and in excellent condition custom shipping crates are manufactured.

Project Director, Natalie Rozot explains the project on her web portfolio

(<http://www.nrozot.com/portfolio-camanabay.html>), “While the lighting masterplan contributes to the welcoming feeling of the new waterfront town, it is also carefully balanced with the surrounding darkness of the Caribbeans. The adjacencies of landscape lighting (hardscape and softscape) and architectural lighting (exterior skins) are merged in a visual language of its own. Customized effects and objects will be recognized as inseparable from the project identity. During the day, they will be framed by the architectural definition of the spaces they inhabit, and at night, they will redefine the moods of every space.”

### **About Spring City:**

Spring City’s core business consists of cast ornamental lighting systems. Our huge design library and advanced data processing bring you full submittal drawings and specifications in minimum time. With Spring City, you can choose from the country's widest range of traditional styles - or create your own custom designs. And since we don't send our work out to another foundry (or another country,) we can maintain tight project timing and stringent quality control over every single step of your job, from initial preparation all the way to final finishing. For more information, please visit [www.springcity.com](http://www.springcity.com)
