Different Style, Different Location **SAME TECHNOLOGY**

Both the Symphonic & X-Series are electrical systems composed of the best chip on the market, and a class one driver. The X-Series accommodates traditional Acorn Lighting while the Symphonic accommodates our other styles, including Dark Sky.

OPTICAL TECHNOLOGY

Both systems take advantage of refraction technology to harness & amplify the directional nature of LEDs. Utilizes the patented Crossfire Optical System, which combines the angle & position of the optics.

COOLCAST™ TECHNOLOGY

Both systems feature Coolcast™ Technology. Our X-Series Coolcast is located on the x-series module, while the Symphonic is built right into the roof.
